School Fair Day

Saturday, Sept. 21
6-11 A. M. placement of exhibits.

II A. M. to 12:30 — good sportsmanship and improved ability over other years.
Jack Lee & Marcelle Massey Chester Rideout & Bill Youell captured most prizes in their respective classes in the jumps.
Judging continued until 1:30

Mrs. Rideout and Mrs. Chapman acted as hostesses to the judges. Luncheon at Hotel.

At 2:30 singing contests took place in Assembly Hall.

Miss Johnston's room winning first in two part song Miss Jensen's first in the chorus.

Following this a physical training competition took place in open air which seemed to be much appreciated. Mr. Scott after remarking on the fine display by all contestants placed Miss Jensen's room first and Miss Young's second. (Collhoome).

The climax of the day was the parade—all Chinook rooms entering and Collhoome.

Miss Kain's room represented Story Bk children, Miss Jensen's children of other lands, Miss Johnston's Famous People of the Hour, Senior room political parties of the time. Miss Kain's room was judged the best.

Mr. Holton, Camrose, Miss Rogers, Camrose, and Mr. Phillips gave short instructive talks in Exhibition building and day concluded with children races plain and novelty.

The exhibits especially in vegetables were notably good considering the dry season and heat.

Many favorable comments were made by the visitors and judges on the interest and enthusiasm and consequent success of school fair in this district.

Report of prize winners up to fourth prize will follow.

A Reasonable Request

Is gratitude numbered among the human virtues?

If so there should be some appreciation for the Wheat Pools in Western Canada to-day.

No organization has fought harder against the strongest kind of opposition.

And all for the benefit of the grain growers of the west.

No organization has so courageously faced danger and even the threat of extinction.

In order that the grain growers might not be sacrificed to greed and the arrogance of wealth and power.

Continuous criticism has been the lot of this farmer organization through the bitter years.

In which it fought for the grain farmers

Surely it is not asking too much to suggest that the grain farmers

Should give their patronage to Alberta Pool Elevators?

It is through deliveries of grain that this organization is kept strong and virile.

Won't you do your part? Every wagon load counts.

Alberta Pool Elevators

The World In Danger

As week succeeds week the possibilities of war between Italy and Ethiopia grow nearer to certitude and the situation becomes fraught with alarming menace, not merely to the two countries involved but to other countries and possibly to the whole civilized world.

With the Italian representatives requesting, one after another, proposals which are being made almost daily by committees of the League of Nations and interested powers, the hope of averting an outbreak of hostilities, and Emperor Haile Selassie refusing to accept any compromise which would result in the surrender of the independence of his kingdom, the situation becomes more and more gloomy, and the gloom deepens with the active preparations which are being prosecuted by Mussolini and the belligerence with which he is whipping his countrymen into a warlike attitude.

Statesmen of the leading nations of the world and international authorities appear to be in complete accord with the general consensus of world opinion that such a conflict would not be confined to Italy and Ethiopia, but that other nations would be dragged into the fray and that it is even likely to lead to a general conflagration which would result in misery and suffering to millions and loss of life and property on an even greater scale than the Great War of 1914-18.

Indeed, there are authorities who see in the present situation a potential destruction of civilization itself. This view is supported by the Committee on International Law of the Canadian Bar Association, which in a report to the Canadian Bar Association's convention in Winnipeg recently spoke of "the consequences to the world and Canada of an actual resort to arms" as probably "catastrophic in the sense that it may include the destruction or profound modification of many of the institutions upon which civilization is based."

Again in the same report, the committee dealt with the conduct of Italy as indicating that government's unwillingness to accept decisions of the Council of the League of Nations, of which she is a member, in the following words:

"If that attitude persists the world may be faced with a complete breakdown of the system of public international order which was supposed to have been permanently established by the sacrifices of the years 1914 to 1918.

"The question is whether or not the peoples of the world will permit this by failure to agree on united action or whether, by united action, they will, as they undoubtedly can, insist upon the observance of the public law upon which the continuance of our present civilization may depend."

The statement that the peoples of the world can avoid this catastrophe by united action refers to the powers which the member countries of the League vested in themselves when they approved Article 16 of the covenants, to which all members have subscribed, agreeing to impose financial and economic sanctions as a punitive measure against any member who breaks the covenants and commits an act of aggression against any other country.

In view of the menace of the situation the importance of these powers become paramount. They are contained in the first and third paragraphs of Article 16 and read as follows:

"1. Should any Member of the League resort to war in disregard of its obligations under Article 12 or 13 and it shall also facto, be deemed to have committed an act of aggression against another Member of the League, which hereby undertake immediately to subject it to the severance of all trade relations, the prohibition of all intercourse between their nationals and nationals of the covenant-breaking State, and the prevention of all financial, commercial or personal intercourse between the nationals of the covenant-breaking State and the nationals of the other States Members.

"3. The Members of the League agree, further, that they will mutually support one another in the financial and economic measures which are taken under this Article, in order to minimise the loss and inconvenience resulting from the above measures, and that they will make available to one another in time of war and special need, at least at one of their number by the covenant-breaking State, and that they will take the necessary steps to afford passage through territory to the forces of any Members of the League which are co-operating to protect the covenants of the League."

It is not perhaps generally known that theonus of deciding whether an act of aggression or incident is to be construed as "act of war" within the meaning of the covenants is left with each individual member to decide. A clause was drafted some years ago vesting the decision with the Council but this has never been ratified by the League.

However, once a member has decided that some act or incident is an "act of war" it has no alternative, under the covenants, but to proceed with the measures outlined in Article 16. Otherwise, that country has itself violated the covenants.

With theonus of interpretation of an "act of war" left upon each individual member, the importance of the general public being fully posted on events as they transpire, can readily be understood, as in the final analysis, it is the people of each country involved who are in the position by their influence, to decide what part their country shall play in the efforts to avert a major catastrophe.

Huge Boulder Slide

500 Tons Of Rock Breaks Loose At Niagara Falls

With an thundering roar, 500 tons of rock broke loose from the cliff on the American side below the lower bridge at Niagara Falls, at a point where 200 tons fell last April.

Huge boulders and shale were piled high on the tracks of the International Railway, gorge line, and traffic was suspended. The railway tracks were lifted from the roadbed and pushed to the brink of the gorge. One pole carrying power lines was moved by the avalanche of rock and sand.

Officials stated it would take considerable time to clear the railway track of the present fall.

Completes Bird Survey

Northwest Territories Good Breeding Place States U.S. Biologist

Completing a two-month survey of nesting places of migratory waterfowl in the Northwest Territories and northern Alberta, L. J. Goldman and C. E. Gilham of the United States biological survey, Washington, D.C., arrived at Edmonton by airplane from Fort Resolution.

Mr. Gilham, who lives at Albuquerque, N.M., expressed himself as very favorably impressed with the extent and possibilities of the north country as a breeding area for waterfowl, but explained he was unable to release the result of his survey until he had reported to the government.

Watertight places of duck and geese on the various lakes as far north as Fort Resolution were surveyed.

Women Like Combines

We'll wager the farmers' wives are glad that threshing is over. At the Jess Denton farm in Alma, Kansas, there were 31 men for dinner and 27 for supper, while at another farm near, where one of the big combines was used, three men harvested 165 acres in a day. That is one place where the machine lessens the work for the women.

A Great Astronomer

Dr. Anna Cannon Has Classified Over 400,000 Stars

That astronomy is not so exact a science that the average man would not be interested were information readily available, is the opinion of Dr. Anna C. Cannon, of Harvard, who was in Toronto as a delegate to the American Astronomical Society's convention.

For 50 years Dr. Cannon has been gazing through telescopes and the mystery of the heavens has given her a thrill for her as ever. Dr. Cannon is the most famous woman astronomer in the world, and she has shamed with Madame Curie of France and others equally famous the honor of receiving the Elie Richeards' prize for outstanding work by women in research.

She was the last recipient of the prize, which was founded to encourage women to study science. But because it was felt women no longer needed encouragement to enter, it was discontinued. Dr. Cannon has continued it, however, for women in astronomy. It is called after her now and it goes to women astronomers.

The prize was given Dr. Cannon for classification of stars according to their spectra. She has classified over 400,000. Harvard is now a mecca for astronomers all over the world who seek astronomical observations of spectra.

An Intricate Problem

Joining Of Steel Plates On Liner Queen Mary Requires Study

Construction of the new Cunard White Star super liner Queen Mary has been complicated by reason of the fact that no two of her steel plates are exactly the same, according to reports from the shipyard at Clydebank. Most of the plates are curved, and many of them are about 36 feet long, 6 feet wide and more than an inch thick. Few are really flat.

The joining of the plates so that the corresponding hole is an intricate problem, and more than 10,000-500 such pairs must be made. Each plate must overlap at least six others adjoining it, creating a problem of arrangement that has required the study of a large engineering staff.

A large half-model of the ship has been laid out on a loft floor at the shipyard, furnishing an accurate picture of the successive rows of plates and a laboratory for the study of the details of construction which are carried out on a larger scale on the ship itself.—New York Times.

Greatest Russian Scientist

Has Done Much To Extend Study Of Nervous System

Both Tsarist and Bolshevik Government have delighted to honor the great Russian scientist, Prof. Ivan Pavlov, says the News of the World. No one living has done more to extend the study of the nervous system of men and animals, and particularly knowledge of the connection between brain and digestion. He was awarded the Nobel Prize for this work as long ago as 1904. Last year, when he was 85, the Soviet Government spent £10,000 on equipping a laboratory for him. It now pays the old man, who was the son of a poor village priest, £2,000 a year, and, according to H. G. Wells, he is the only man who dare answer Stalin back.

New Variety Of Dahlia

A Siamese-twin dahlia, which may be the forerunner of a new variety of this autumn flower, was displayed at Victoria recently. The freak bloom was grown by Mrs. W. G. Gordon of Sooke, B.C. It is two flowers joined together at the calyx. The dahlia is of the pompon variety and the back-to-back flowers almost form a solid ball of pink petals. Plant experts termed it a queer aberration of nature.

Village Needs Pied Piper

Fifty rats a night are being killed in the village of Chilthorne, England. All the men have enlisted into an anti-rat army to combat the ravages of the rodents, which have laid siege to one farm and have become a plague. So far the rats have won.

To help teach children music a resident of Portland, Ore., has invented a metal plate painted with a staff to which magnet backed paper notes can be fastened.

Burns & Scalds

MECCA OINTMENT

Gas Test Well

Great Activity Shown In Hudson Bay Junction Territory

Amalgamated Oils Ltd. brought the fourth gas test well on the Kalkwa structure recently. The flow was encountered at 275 feet, the same level at which gas was found in other wells, says a report from Hudson Bay Junction.

The four holes have been drilled largely with a view to securing geological data on the structure, which is very large. A test for oil somewhere in the Pilew hills is now considered justified.

It was stated unofficially that the Senator Oil and Gas Development Company, Ottawa, intended shipping a rig to Hudson Bay Junction and drilling for oil on the structure where the Trail Blazer Company put down a hole last year. This structure is near Hudson Bay Junction and quite distinct from the Kalkwa structure, 25 miles distant.

The idea is that a catering firm

will provide breakfast and evening dinner, put it in the refrigerator overnight, charging so much a week for the service. Hubby just leaves a note suggesting what he would like and the thing is done. Thermos containers will keep the food warm. And what's more the company will do the dish washing.

Another branch of the service is valeting. Socks are to be left in a bag, collected, and returned next day, washed and mended.

Perhaps wifey may not like this idea. One of the greatest satisfactions she gets out of her holiday is the thought that hubby is putting up with so much discomfort that he will realize how much he depends upon her and will appreciate her all the more when she comes back.—St. Thomas Times-Journal.

Thomas Times-Journal.

Rare Animal From Africa

Okapi In London Zoo Looks Like Miniature Giraffe

Leo, the Okapi, one of the rarest animals in the world, has taken a prominent place in London Zoo Society.

Leo comes from Africa and is the talk of the town. An Okapi (O-kä-pi), with the accent on the second syllable), includes in equal proportions the characteristics of the giraffe, the deer and the zebra. He looks like a miniature giraffe.

One of the shyest of animals, the Okapi has been hunted almost to the point of extinction by the pygmies of the Luri forest with their deadly blow-guns.

Hurts Coal Industry

Bitter Complaint Against Natural Gas Competition In Alberta

Use of natural gas in Edmonton last year deprived mines of a market for 350,000 tons of coal. Sir Montague Barlow, eminent British authority on collieries, was told as he opened his investigation of Alberta's coal industry. Bitter complaint against natural gas competition was voiced by Mayne Reid, counsel for 10 coal companies. Mr. Reid also informed Sir Montague that truck and bus competition to railways has reduced the market for steam coal.

The only explanation he can give now is that the property must be under water. It is said the matter was settled by the payment of the municipality of the amount paid for the land by sellers at the tax sale.

FASHION FANCIES

Sounds Like Good Scheme

Husbands Left Alone During Holiday Will Be Looked After

A scheme is being mooted in Old London to meet the needs of that unfortunate section of humanity—the husbands whose better halves have gone on ahead on their holidays, or who are staying another fortnight longer. Most husbands have this experience now and again. They fix up meals somehow, make the best just before friend wife comes back, and use up all the socks in the drawer pending her return to darn them.

The idea is that a catering firm will provide breakfast and evening dinner, put it in the refrigerator overnight, charging so much a week for the service. Hubby just leaves a note suggesting what he would like and the thing is done. Thermos containers will keep the food warm. And what's more the company will do the dish washing.

Another branch of the service is valeting. Socks are to be left in a bag, collected, and returned next day, washed and mended.

Perhaps wifey may not like this idea. One of the greatest satisfactions she gets out of her holiday is the thought that hubby is putting up with so much discomfort that he will realize how much he depends upon her and will appreciate her all the more when she comes back.—St. Thomas Times-Journal.

Thomas Times-Journal.

Land Has Disappeared

No Trace Can Be Found Of Property In Esquimalt

H. Seller of San Francisco was surprised recently to find a lot on which he had been paying taxes for over 50 years had disappeared.

Seller went to Victoria, B.C., to secure a title of a piece of property in Esquimalt, left to him by his father. He visited the land registry office and real estate operators both there and in Esquimalt, but could find no trace of the property.

His father came to the coast about 60 years ago, and, becoming interested in Victoria real estate, purchased the land which he left to his son on his death. The son was advised to hold the property as a dry-dock was to be built at Esquimalt which would increase its value. He let the land go at a tax sale and bought it back again.

The only explanation he can give now is that the property must be under water. It is said the matter was settled by the payment of the municipality of the amount paid for the land by sellers at the tax sale.

Huge Cliff Demolished

Blasting In Scotland Dislodges Millions Ton Of Granite

One of the greatest blasting operations in Scotland was successful recently when a granite cliff 500 feet high and stretching 400 feet across the face of Ben Dhuirich, near Bonawe, was "demolished" by gunpowder. A signal was flagged from a tiny island in Loch Etive. At this a man crouching on the mainland, under a protective rock ledge in a forest 500 yards away, pushed down the lever of a dynamo, and the cliff tumbled into a myriad fragments. Powder fumes and granite dust rose in a cloud 2,000 feet high. In that second there was crowding triumph for men who had planned for the last four years to destroy the cliff and by the touch of a lever there had been gained for industry 1,000-ton tons of granite.

The success of the blasting, which cost \$20,000 to carry out, means that 400 quarrymen will be given work for six years.

Promised Left

The play had reached its climax. There were tears in the eyes of the audience, for the villain had just kidnapped the heroine. The hero then came on the stage to find his sweet heart gone. Clutching hold of the table with trembling hands he cried out loudly: "She is gone! She is gone!"

Somewhere in the "gods" the shrill voice of the new sales boy cried: "Peanuts, chewing-gum, chocolate and ice-cream!"

Bird Was Artistic

At Eglington Rectory, Derbyshire, a small stream flows through the garden; on the bank among the reeds and irises a moorhen built her nest; morning after morning the edge of this was carefully decorated with sprays of buttercups gathered from the adjoining meadow.

Spectators Were Scared

An artist's zeal brought a police car and ambulance and halted work in a Boston office building. Perched high on a roof, painting a skyscraper view of the waterfront, the young artist did not know that office workers called police to halt his "suicide."

Now's the Day and Now's the Hour

With times improving, roll-your-owners, "who has smoked Ogden's Fine Cut in the past are crowding back to Ogden's because of the satisfying cigarettes it assures. And they are learning again that the best really costs very little. "Now's the day and now's the hour" for you, too, to get back to this favourite cigarette tobacco. And remember "Chantecler" or "Vogue" are mighty fine papers.

52 Poker Hands, any numbers, now accepted as a complete set.

OGDEN'S FINE CUT
Your Pipe Knows Ogden's Cut Plus

Dropped From The Sky

Massed Landing Of Troops Practiced In Military Maneuvers

Soviet military strategists dropped an army from the sky recently as they practised their latest war manoeuvres—mass landing of fully equipped troops with parachutes. Bearing rifles and sub-machine guns, the jumpers landed behind "enemy" lines, formed ranks quickly and bore down upon an opposing airfield.

Whole regiments, landing from the skies, succeeded in capturing the airfield, but later came to theoretical grief. When they used the airfield as a base from which to advance overland to attack the main "enemy" forces from the rear, they were met by a quickly mobilized defence force which, with the aid of tanks and armored trains, "annihilated" them.

Advice For Everyone

Doctor Says People With Colds Should Be Isolated

If you have a cold, go home and isolate yourself. This is the advice of Dr. Gordon P. Jackson, M.O.H., of Toronto, who remarks that people do not consider colds with sufficient seriousness. The common cold, he points out, is responsible for greater financial loss to business than any other single disease.

"The common cold is highly communicable," he says. "And the change from the nice weather to the cold nights we now have, lowers the average individual's resistance."

SYNOPSIS

Nancy Nelson is a sub-deb, a gay, irresponsible girl of nineteen, with no care beyond the choice of her costume and the company she keeps. Suddenly, in the market crash, her indulgent father loses all he had, and his family is faced with the necessity of a simpler method of living. At first, Nancy resents the change from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at Pine Ridge.

Nancy set out one afternoon to climb to the top of a hill so as to obtain a view of the surrounding landscape and missed the turn-off. Auron Tubbs had told her to follow. A truck comes along the road, driven by Matthew Adams, and she asks him which way to go. They ascend the hill, however, and there is the house of Cousin Columbine's. There Mark Adam tells Nancy that his brother Luke has broken his leg, and that Jack Nelson has been hired to help out. Luke's leg gets better. With Jack away, Nancy finds that she is lonesome, and having no books to read, the idea of starting a public library at Pine Ridge seems a good one, and Nancy writes home to get her parents to send her books they could spare, and all they could induce others to let them have.

Nancy and Matthew Adam go Christmas shopping in a neighboring town. On their return to Pine Ridge, Nancy goes to see Mr. and Mrs. Tom, and asks Matthew if he knows why. He said: "Let's go in and see." Then Nancy learns that she is having her debut, but in a different setting than had been planned, in Boston, that had been planned.

Nancy's parents and friends gave their liberal support to her request for books, and a sizeable box arrived in due course. Father Adam painted a sign for the library, and the boys worked on the shelves to make the room look presentable.

Jack Nelson, Matthew Adam, and Nance are back to the side, and after Nancy and Jack leave for home, they are caught in a blizzard.

Now Go On With The Story

CHAPTER XVI

The ride to Prairie Ranch had been a jolly one, and a new experience to the young Nelsons. "Uncle Tom and Aunt Emily" welcomed them warmly, and even suggested that they stay a day or two, so Mark would be glad to accompany them home; but Jack demurred.

"With both Matt and Mark away, Mr. Adam needs me," he explained, "and what's more, I think we'd better start right back if we're to go alone. Soon as Mark's better we'll be glad of the chance to come and get him; but, really, I'd feel easier to go back to-day."

"He's right, Matthew," commanded Uncle Tom. "It's not quite fair for me to steal two of your father's sons and his 'hired man' as well! And as Jack says, it's better for them to start soon and take their time. Run up and say a word to Mark, we'll—

"I'll Tell Anybody Gin Pills are Good"

writes a Lunenburg, N.S., man who had suffered from rheumatism. He further states: "I can't praise Gin Pills enough. After using them I am now able to go around without a cane."

If your kidneys are not efficiently disposing of the waste matter in your system excessive acidity may develop, resulting in painful joints, sciatica, lumbago. At the first sign of kidney trouble take

it. We—we can't miss it. Do you understand?"

Nance understood only too well. There followed a mile or so when neither spoke. Twice Jack got out to wipe the glass, while his sister, staring into the wind-swept space, fought terror. Snow was descending fast and furiously now. Indeed, as they kept on doggedly it seemed incredible that this was the same bare road they had traversed so short a time before with friendly sunniness dapping the plains on every side. It might, thought Nancy, have been snowing here for hours and hours. Could it be possible that they were off the road? Straining her eyes into the drifting white, watching in desperation for the wayside mail box, visions of frozen cattle rose up before her, and the girls heard thud.

At last Jack said, not looking at his sister: "We've missed that ranch. This must have been as far as this. What say we turn back now, and try to reach the schoolhouse? The wind would be behind us anyway; and as it is I can't see four feet ahead. It looks to me as if our best chance was to—"

The words were silenced by a cry from Nancy, a cry of warning that came too late. Jack jammed on the brakes so suddenly that his sister was thrown forward against the windshield just as the car collided with the engine of a big school bus, which stood, its black wheels resting on a snow-filled gully as it extended crazily across the road.

CHAPTER XVII

As Nancy righted herself again, her eyes met Jack's, a glance of stark despair passing between them. "I'm afraid that crash has finished this old car," he told her; then added: "Why, Nancy, I think that bus is full of children!"

"Hi, there!" came a voice almost at his elbow. "Had a smash, didn't you? Did you meet Clem?"

Jack turned to see a boy of perhaps eleven, standing amid the swirling snow.

"Skip back into that bus, kid," he shouted, "we're coming to you."

He was already out, stretching a helping hand to Nancy, and together they fought their way to the door of the stalled bus, the youngster calling over his shoulder: "Watch where you go there! Don't step into that deep rut, Miss—you gotta jump over it!"

Then the door flew open to admit them and Nancy, exhausted, sank into the nearest seat, he continued with a captivating grin: "We got company, kids. These folks is changin' cars at this station. Say!" (turning to Jack), "did Clem Johnson send you us?"

Jack shook his head, and glancing about the bus, inquired. "Is he your driver?"

"Just for to-day. Our regular driver's sick," explained the boy, before Jack finished speaking. Big balls of tumbleweed scurried across the prairie, and clouds of dust obliterates the road.

"Perhaps we'd better turn and go back," suggested Nancy, ducking her head against the particles of dust. "Cousin Columbine insisted we mustn't start in any sort of storm you know, and—" (her voice rose in alarm) "and it's really snowing! It's beginning to snow hard!"

The boy leaned forward, scanning a sky that grew darker with incredible rapidity.

"How far back did we pass that schoolhouse?" His voice, Nancy noticed, was tense, unnatural. "I don't want to scare you, Sis, but this looks bad to me. If we could reach the school I'd take a chance at waiting there until the worst is over. What do you say?"

"I say we keep right on to the first ranch. That school was six or eight miles back; and when we passed I noted particularly that the bus had left. Perhaps they closed at noon to-day."

A stinging flurry of snow was on them now, cutting across their faces like whip. For a moment it took Jack's breath away; then he replied:

"I guess you're right. There was a ranch somewhere along here. I remember seeing the gate and mail box. Help me into this jacket, will you? I don't want to stop the car. Gosh! Nancy, we're headed straight into the storm. That's it" (as she struggled to get his arm into a sleeve), "don't bother about the other. Get into your own coat quick—or wrap it round you. Look at this snow! The windshield's covered already. I'll have to get out and wipe it off."

"Are there any side curtains in this old car?" cried Nancy as they started on after a short delay.

Jack shook his head as he bent tensely above the wheel.

"Darned if I know; and you couldn't put 'em on in this wind anyway. Keep your eyes peeled for that mail box, Nancy. We mustn't miss

ones, however, grew noticeably quiet as time passed, trying to peer out of the snow-covered windows, and speaking together in low voices.

At last Jack and Tom Osgood started some wrestling matches at the rear of the bus; while the older girls roused themselves in an effort to keep the others occupied. They danced, jumped up and down, and did gymnastics, but despite this exercise they were growing colder every minute, and when during some roughhouse, a small boy's elbow went through a pane of glass, a cry of dismay arose from one and all.

It was then that Tom Osgood had an inspiration. Stored under the back seat and carried for just such emergencies, were canned food and a small, portable stove.

"I'll say we were pretty dumb not to think of 'em before," he observed disgustedly, "but we've never had a chance to use 'em, and I guess every one forgot." Tom had been running about on his hands and knees, and now stood up, a bewildered expression on his many little face.

"Why they're not here! Not anywhere. We've always carried 'em, and extra blankets too. Say! I bet

I know what happened. Joe took me out when he cleaned the bus this morning, and forgot to put 'em back when he had that pain. He always sets 'em in the harness closet out of the dust; and maybe Clem spaced them when they were right here, or praps he didn't know they'd ought to be here. Gee! I'm hungry, and some of that canned soup would have tasted good."

There followed another fruitless search, the children watching with strained, unchildlike faces.

"Don't cry, kiddie," said Jack, as a small girl burst into frightened tears. "I'm going to make a stove out of this milk can. We'll soon be opening windows to cool off!"

Nance forced a smile at her brother's attempt at cheer, and lifting the crying child onto her lap, wrapped her coat about the small, cold legs. The bus was shaking with each gust of wind, and though every window was thick with frost, she knew the storm had increased in fury.

(To Be Continued)

One Business Booming

Fir In England Swamped With Orders For Jews' Harps

"Industrial Britain" informs us that Birmingham, the only city in the world where Jews harps are manufactured, is experiencing such a boom in this respect that prospective players all over the world, especially in America, are obliged to wait delivery.

The delay is due to a lack of skilled tongue setters, who have to be trained for several years before they are proficient. The setters are responsible for the adjustment of the metal strip that vibrates to produce the sound, and if this strip is the merest fraction of an inch out of adjustment the tone of the harp is ruined. One firm in Birmingham is producing 100,000 harps a week, and has enough orders in hand to keep the factory busy for three months.

The head of this firm has just returned from a business trip in the United States, where Jews' harp bands are popular, with one thousand sets sold.

The territory would be designated as the "circle tour" and would extend from Winnipeg to Kenora, Ont., to Fort Frances, Ont., through north-eastern Minnesota to Detroit Lakes, Alexandria, the Twin Cities, Fargo, N.D., and then north to Grand Forks, Crookston, and back to Winnipeg.

—Brookville Recorder and Times.

W. H. Hitchman, of the National Aerodynamics Association, announced that the Federation of Aeronautique Internationale in Paris, will be asked to credit Howard Hughes, wealthy film producer, with a world speed record for land planes of 347 miles per hour.

This speed was attained by Hughes

in a series of tests near Santa Ana, Calif., in his 14-cylinder, 1,000 horsepower monoplane.

The present record of 314.310 miles

an hour was set by Raymond Delmotte, of France, in 1934.

The population of the world has been estimated at two billions by the Statistical Institute of the League of Nations.

Mountain sheep are almost extinct in Washington and Oregon now.

CROP TESTING PLAN

Over 20,000 farmers' fields of wheat have been tested under the above plan during this past month. Some 6,000 samples graded "A," indicating they were sufficiently true-to-variety to be used for seed. Any National Elevator Agent will supply the names of those farmers in your district whose samples graded "A."

Born—to Mr. and Mrs. Jack Foster Nanton, a son. Mrs. Foster is daughter of Jas. Davis.

Obituary

The death of Mr. George Head occurred in a Calgary hospital Wednesday, following a surgical operation for the removal of a kidney. The late Mr. Head was pre-deceased by his wife about 18 months ago at Chinook, and since that time had worked on the farm of A. T. Davis, south of Drumheller. He was thirty-one years of age and came to Canada seven years ago from the United States. Two children, who are being cared for by Mrs. Davis, are left to mourn his loss.

The funeral was conducted at the Baptist church Friday, with the Rev. Mr. Phillips officiating.

The regular meeting of the WI will be held on Wednesday, October 2nd at Mrs. Chapman's home. The programme will be in charge of the "Handicraft" committee and will include a practical demonstration of how to make hooked rugs from gunny sacks. All interested are welcome.

Engineer From Rocky Mountains Becomes Deputy Minister of Interior

of the Department of the Interior for many years. He was born in Chilliwack, British Columbia, on June 25th, 1888, received his education at New Westminster, B.C., and Queen's University, Kingston, where he graduated with the degree of bachelor of science. Mr. Wardle joined the department of the Interior in 1913, and was appointed Superintendent of Banff National Park in 1918, continuing in that office until 1920, when he was transferred to Ottawa as chief engineer of the Canadian Parks construction. He was given the post of chief engineer in 1923.

An expert on mountain highway construction, Mr. Wardle supervised the building of practically all main highways in the National Parks of Canada. Under his direction the Banff-Windermere highway, the first major road across the Central Rockies, was completed in 1923,

and in 1927 the road known as the Kicking Horse Trail, from Lake Louise, Alberta, to Golden, British Columbia, was also completed. He has supervised the building of the eastern leg of the Big Bend highway along the Columbia River from "Dipidah," B.C., to Boat Encampment, and recently was placed in charge of the construction of the "Rocky Mountain" trail from Revelstoke, B.C., north to Boat Encampment. This highway when completed will form the final link in the western section of the trans-Canada highway.

The latest highway project to come under Mr. Wardle's supervision was the road under construction from Lethbridge to Jasper, Alberta. Mr. Wardle has also had charge of all other construction work in the National Parks. He takes over his new duties with the best of his many friends in the Rockies, and, indeed, throughout Canada.
